

Two Models of Agency

■ Retributivists (n = 371) ■ Deterrence or incapacitation first (n = 453)

Agency as blameworthiness: predicts retributivists higher

Agency as benevolence: predicts retributivists no higher

Share: percentage with a mean above 4, the scale midpoint. Benevolence shares are the paper's (Figure 11); blameworthiness, new. Preregistered as mean differences vs all 577 others (H13, H16, H17, H19); not this comparison group, the shares, or the grouping.
